PRODUCT SPECIFICATION

Radiating Coaxial Cable

HQ 50S-78

PRODUCT DESCRIPTION

- The cable is used as a distributed antenna to provide communications in tunnels, subway mines, large building complexes, and any other application in confined areas.
- Slots in the copper outer conductor allow a controlled portion of the internal RF energy
 to be radiated into the surrounding environment and can be designed individually.
- With the broadband capability of 75~3000MHz, this cable is used for both one-way and two-way communication systems, and a single radiating cable can handle multiple communication systems simultaneously.

CONSTRUCTION

| Inner conductor | Smooth copper tube | Φ 8.70mm |
|-----------------|---|-----------|
| Insulation | Physically foamed PE | Ф22.50mm |
| Outer conductor | Corrugated copper tube with single row milled slots | Φ 24.90mm |
| Jacket | Non-halogenated, fire retardant PE | Φ 27.30mm |

MECHANICAL PROPERTIES

| Minimum bending radius | mm | 140 |
|------------------------|----|------|
| Tensile force | N | 1500 |

ELECTRICAL PROPERTIES

| Impedance | Ω | 50±2 |
|-----------------------|-------|--------|
| Capacitance | pF/m | 75 |
| Propagation velocity | % | 88 |
| DC breakdown voltage | kV | 10 |
| Insulation resistance | MΩ•km | >10000 |
